About the product

The A-Stand is based on a design by PhD Dan Steingart and serves a functional and practical need in improving the ergonomic work position at your workstation.

The simple and Iconic industrial design is inspired by the use of plumbing tubes in designing anything from chairs to lamps.

The idea of creating a laptop stand out of plumbing tubes was taken up by AIAIAI Lab and was further developed into it's current design and choice of material.

TECHNICAL SPECIFICATIONS

Colours: Yellow, White & Black

Material: PVC tube with rubber coating

Dimensions: 360 mm long x 310 mm wide x 150 mm high

Fits: All laptop computers

2009 AIAIAI
